Re: Thirty (30)-Day Extension of Generator's  
Hazardous Waste Accumulation Time  
Mobil Oil East Chicago  
3821 Indianapolis Boulevard  
East Chicago, Lake County

Dear Mr. Jacoby:

Your letter dated July 21, 1989, requesting a thirty (30)-day extension to the ninety (90)-day hazardous waste accumulation period has been received. In that letter and subsequent communications, you requested an extension because the wastes are unacceptable for disposal at CID, Illinois and you are waiting for acceptance at Adams Center, Indiana. The subject waste in storage consists of:

1. 80 cubic yards of caustic tank bottom sludge, pH 13 (D002).
2. 80 cubic yards of leaded tank bottom sludge, EP toxic for lead at 10.1 ppm (D008).
3. 120 cubic yards of cooling tower mud, EP toxic for chromium at 11.0 ppm (D007).

Our review indicates an extension is justified due to Mobil Oil East Chicago's extenuating circumstances. Therefore, pursuant to 329 IAC 3-9-5(b), a thirty (30)-day extension is granted. This extension will expire on September 14, 1989. Be advised that no further extensions can be granted under Indiana Rules.

If you have any questions concerning this matter, please contact Mr. Mike Wilhelm of this office at AC 317/232-4402.

Sincerely,

Bruce H. Palin  
Acting Assistant Commissioner for  
Solid and Hazardous Waste Management
